

Slings

For comfort and safety

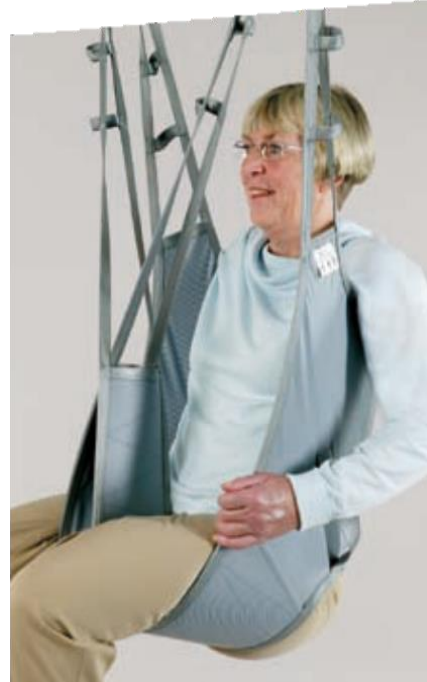

DOMINO SLINGS

Made of Grey Polyester Comfort Material

Domino Slings are produced using a specially manufactured polyester material, which unites comfort with an incredible strength. The material has an emery finish on the inside. This gives the Sling a cotton-like surface, which is both comfortable for the user and at the same time ensures that the Sling does not slide. The material is fire retardant.

Domino Hygiene is incl. safety belt. Suitable for lifting persons to and from sitting positions. Suitable for hygiene and bathroom purposes.

Domino Active. Supports the body up to shoulder height. Easy to use, as the leg and back sections are extra padded with special foam material. Safety belt as an accessory.

Domino Classic. Suitable for persons with little control over their head and body. Suitable for lifting from a lying position. Supports the whole body. Extra foam padding in leg, body and head section – for better comfort.

Domino Thorax. Only for stand-up hoist. Unique design and padding. Provides optimum support for stand-up lifting. Can also be supplied without padding under the arms.

DOLPHIN SLING – Made of White Polyester

Suitable for use in Bathrooms. The water can easily pass through the material and ease cleaning.

Dolphin Classic. Suitable for persons with little control over their head and body.
Suitable for lifting from a lying position. Supports the whole body.

ACCESSORIES

Detachable 20cm long strap loop is available. This can be fitted onto the slings if you need increased possibility of individual adjustment and lifting position.
